Application No. 10/608,818

MAR 05 2008

Amendments to the Specification

Please amend paragraph [0020] as follows:

-- Mobile VPN client software (VPN client) is first installed in mobile device 10 for communication with security service manager (SSM) server 20. The VPN client is shown in FIG. 3 as one of the installed applications 72 in mobile device 10, and is explained more fully below. The user can download the VPN client using an ordinary web browser, via an infrared, BLUETOOTH, or WLAN connection, via broadcasting or multicasting (e.g., DVB-T or its modifications), via email, or via CD-ROM or other removable media (e.g., any other machine-readable medium having machine-executable instructions). The VPN client is delivered as, e.g., a SYMBIAN OS operating system SIS file for easy installation in mobile device 10.
